Includes actual Cyst and cancer lymph node treatments, lectures on PEI and RFA and extensive time in workshops doing work on models, AceNeedleME torso, bovine liver with "beef" nodules to actually do RFA ablation practice.

3-5 DAY COURSES ONLY

Thyroid Tumor RFA Ablation

Thyroid RFA is not available in the USA today but will be soon. Until then to avoid a surgery that could be complicated, SMTC's Dr.Guttler is offering a chance to have thyroid RFA now.

The evaluation and referral system is a sure way to avoid surgery, and a scar. Also the fees are less than 10% of the surgery bill. The complications are minor and less than surgery. There is little chance of needing thyroid hormone after thyroid RFA while 30% of surgery patients need it.

Thyroid Tumor Ethanol Ablation PEI

Ethanol ablation PEI is done at Santa Monica Thyroid Center for thyroid and parathyroid cysts, local recurrent cancer lymph nodes and as alternative to surgery or active surveillance for primary micro-papillary thyroid cancer.

This procedure saves the patient from hospitalization for thyroid surgery. It is safe less expensive and is done as an outpatient. Each PEI saves about \$ 35-50,000 surgery bill.
